

WALT: Calculate the area of shapes (including compound shapes)

1. What is the area of this rectangle?

2. Find the area of this triangle. (Remember that we find the area of the rectangle then divide this by 2!)

3. What is the **total area** of these 2 shapes?

4. If you had a triangle with width 8cm and length of 12cm, what would the area be?

5. If you had a rectangle with width 9cm and length of 4.5cm, what would the area be?

6. What is the area of this compound shape?

7. Type, onto your weekly word document, the letter for the shape/shapes which have an area of  $64\text{cm}^2$ .
