

Recall and use equivalence between fractions, decimals and percentages

- 1** Complete the table below to identify equivalent fractions, decimals and percentages.

Fraction	$\frac{1}{2}$		$\frac{1}{4}$			
Decimal		0.75			0.4	0.125
Percentages				20%		

- 2** Draw lines between any values which are equivalent.

60% 70%
 $\frac{1}{8}$
 0.6
 0.7
 $\frac{3}{5}$ 12.5% $\frac{7}{10}$ 0.125

- 3** Put the values in the correct position on the number line. For some, you will need to estimate the position. For each value, write the equivalent fraction, decimal and percentage. An example is shown.
