

Science - Week 5

Classification and habitats

Online Investigation and activities

Activity 2 – Online investigation

Activity 3 - Follow up activities

Activity 2 – watch the video on this link of a lesson and complete the student sheet of activities to do with the video

Before you start, you will need a sharp pencil, ruler and piece of plain paper to sketch a woodlouse

<https://encounteredu.com/live-lessons/ks2-habitat-exploration-300420>

Activity 3 - to create a nature frame

You will need: a sharp pencil, a ruler, piece of cardboard and a pair of scissors

Optional - felt tips/coloured pencils/coloured craft paper and glue

Create a nature frame as demonstrated in the video. It is purely optional to decorate with coloured arts and craft papers and materials if you have at home. If you do not have any of these, you can use felt tips, or as the video says, just write details or draw on pictures of observations in pencil.

If you are exploring your own garden after, you can sketch additional invertebrates if you find any.
