

**Mathematics Assessment: NUMBER - Number and place value**

Name..... Class..... Date.....

- 1** Write the following numbers in words. For example, **68,462** would be 'sixty eight thousand, four hundred and sixty two.'

**a** 3749 .....

**b** 72,283 .....

**c** 683,509 .....

**d** 9,327,000 .....

2 marks

- 2** Put the following numbers in order of size, starting with the smallest.

**a**      2347      2768      2124      2986

smallest

largest

b

746,924

745,429

764,249

smallest

largest

c

2,946,135

2,946,153

2,964,135

smallest

largest

2 marks

3 Look at the number **2,786,493**.

a What is the value of the digit **4**?

b What is the value of the digit **7**?

c What is the value of the digit **8**?

2 marks

4 In the number **864.325**, what does the digit **2** represent?

**Circle** your answer.

tenths      hundreds      hundredths      thousandths

2 marks

**5** Round the following numbers to the nearest **1000**.

a 696 →

b 5499 →

2 marks

**6** Round the following numbers to the nearest **10,000**.

a 61,426 →

b 628,462 →

2 marks

**7** Round the following numbers to the nearest **1,000,000**.

a 6,937,246 →

b 36,976,899 →

2 marks

**8** Calculate the difference (across zero) between the pairs of numbers below.

a -6 and +8 difference =

b +32 and -7 difference =

c -92 and +43 difference =

2 marks

**9** On Mercury, the temperature drops at a rate of **12°C** per hour.

If the temperature starts at **+17°C**, what would the temperature be after **6** hours?

°C

*Use this box if you need to do any working out.*

2 marks

**10** Basha's target for throwing the rounders ball was **27** metres. She recorded each of her **6** attempts above and below her target as follows.

-4m    +6m    +2m    0m    -5m    +1m

What was the difference between her longest and shortest throw?

m

2 marks

- 11 Nisha worked out that she would need exactly **4672** beads to make necklaces and bracelets for all of her friends.

The craft shop sold beads in packets of **1000** and in packets of **100**.

How many packets of each would Nisha need to buy?

packets of 1000

packets of 100

2 marks

- 12 Kofi wants to estimate the answer to the calculation **18,625 - 9486**.

**Circle** the best estimate.

18,600 - 9500

18,500 - 9600

18,400 - 9500

2 marks

13 Tick the box below which contains the smaller number:

Tick (✓)

999.99

or

1000.01

So many nines  
and zeros - that's  
tough!

Explain how you know in the box below.

2 marks

14 Look at these digits; **9, 4, 1, 7, 2, 3**

Make the **smallest** number you can, by rearranging the digits.

Write your number in the box.

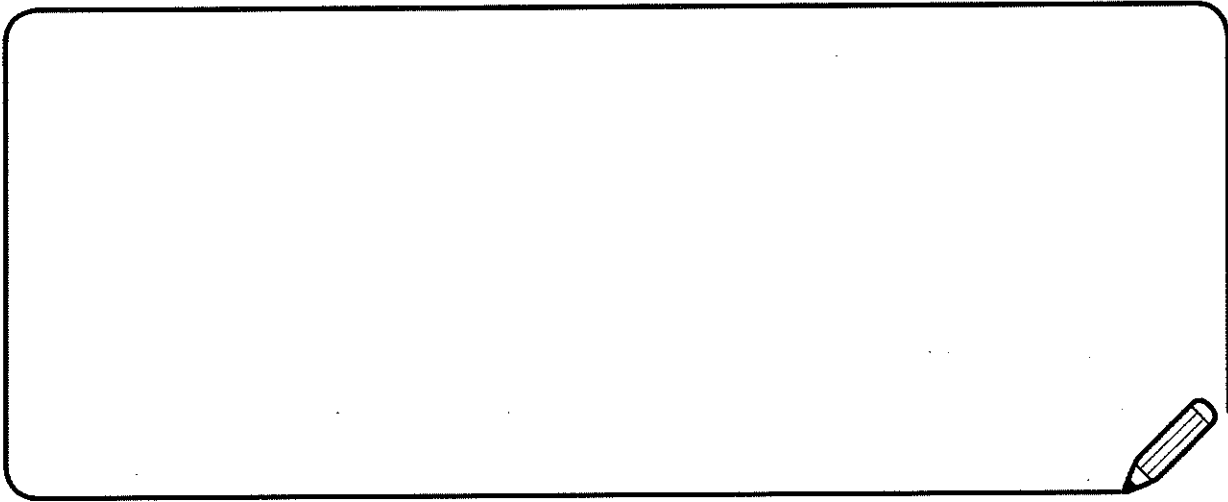

2 marks

- 15 Jina wanted to write down the number, 'four hundred and nine thousand, two hundred and sixty five'.

She wrote down this number:

490,265

Explain her mistake in the box below.
