

Creating 2-digit numbers

$$\boxed{10} + \boxed{7} = \boxed{}$$

$$\boxed{10} + \boxed{4} = \boxed{}$$

$$\boxed{20} + \boxed{1} = \boxed{}$$

$$\boxed{20} + \boxed{5} = \boxed{}$$

$$\boxed{10} + \boxed{9} = \boxed{}$$

$$\boxed{20} + \boxed{2} = \boxed{}$$

$$\boxed{} + \boxed{3} = \boxed{23}$$

$$\boxed{10} + \boxed{} = \boxed{11}$$

Add the pairs of place-value cards together. Write the missing numbers on the blank place-value card.

ACTION

Use place-value cards to make each number.

THINK

I'm thinking of a number. It's got three 10s and five 1s. What is the number?
